

APR 10 1991

Request for BTAG Comments on the Dayco Corp./ L. E. Carpenter Co. Site in Wharton, New Jersey

**Jonathan Josephs, Project Manager
New Jersey Superfund Branch II
Emergency and Remedial Response Division**

**Shari Stevens, Environmental Scientist
Surveillance and Monitoring Branch
Environmental Services Division**

The purpose of this memorandum is to request that the Biological Technical Assistance Group (BTAG) identify and comment on any ecological issues that warrant discussion for the Dayco Corp./ L. E. Carpenter Co. Site in Wharton, New Jersey. I have attached the following sources of background information for BTAG's use:

1. the June 1990 Revised Report of Remedial Investigation Findings, Volumes I and II
2. the draft Baseline Risk Assessment report dated November 20, 1990 (Section 6 of this report, entitled "Ecological Risk Assessment" is especially relevant)
3. the February 27, 1991 letter from Weston Services to NJDEP (Page 3 mentions some planned additions to the Ecological Risk Assessment.)
4. the April 1, 1991 Draft Feasibility Study Report (Pages 1-18 and 2-18 may be of particular interest. The latter page raises the possibility that there may be wetlands on-site.)

These documents were prepared by contractors working for L.E. Carpenter & Company pursuant to an Administrative Consent Order issued by the New Jersey Department of Environmental Protection (NJDEP). With the exception of the February 27, 1991 letter, I will need to have the attached documents returned to me after BTAG has made copies of the portions of interest for its use.

I will very much appreciate hearing BTAG's comments on the ecological aspects of the Dayco Corp./ L. E. Carpenter Co. site.

Please contact me at 264-8098 if there is a need to discuss this matter.

cc: L. Tannenbaum, PSB
